

Success Story **COBO4YOU/COMAU**

Fighting MSDs : French/Italian partnership signed thanks to Enterprise Europe Network

COBO4YOU is a French consulting company specialised in management of arduous work thanks to integration of robotics solutions in industry, created in 2019 by Benoit LYAUTEY with the support of CCI Haute-Saône and CCI Bourgogne Franche-Comté.

At a very early stage, the company COBO4YOU has been informed of the Enterprise Europe Network services delivered to innovative SMEs such as IPR, EU fundings and partnering activities. A successful approach opening quickly new perspectives.

From technology watch

In April 2020 in the midst of the COVID crisis, the company was informed of an innovative exoskeleton developed by COMAU, a leading company in the industrial automation field at global level, and promoted through a technology offer published in the Enterprise Europe Network by the local EEN branch, Torino Chamber of Commerce, Italy.

Via a fruitful connexion

After checking the common interest, both companies were quickly put into contact. Taken into account the level of expertise of COBO4YOU and the interest of the company's profile for COMAU, COBO4YOU was connected to RMI, French partner of COMAU in the region, leading to a French/Italian winning cooperation. With already one exoskeleton placed in an industrial company, COBO4YOU can also train the operators to use it.

To a winning partnership

The cooperation with COMAU enables COBO4YOU to expand the range of products offered to its industrial clients with an innovative exoskeleton, adapted to very specific tasks on the upper part of the body.

Moreover, COBO4YOU's expertise allows RMI and COMAU to reach new targets and deeper penetrate the market. COMAU and RMI will empower the services provided by COBO4YOU as an expert in the ergonomics at work. And more business is coming.
